

In order to keep our patients and staff safe from COVID-19, we are working hard to decrease the spread of the virus. We have implemented these policies:

- Offer patients Telemedicine Video Appointments to continue care without leaving their homes
 -
 - Please call 412-372-6330 to set up your Telemedicine Video appointment
 -
 - Screen patients for symptoms (fever, cough and shortness of breath) and request patients to cancel who are symptomatic
 -
- Patients who are symptomatic in the office will be asked to leave and reschedule appointment
 -
- We are restricting our waiting rooms to 10 patients only—other family members/visitors must wait outside
 -
 - We are limited our clinical area to patients only
 -
- Our employees are diligent in self screening for symptoms and will be sent home if needed
 -
 - We are promoting social distancing and increasing our disinfection policies

Together we will help to slow the spread of coronavirus and keep our patients and staff safe.
